The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5 and 14 are rejected under 35 U.S.C. 102(e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Goebel, for the reasons given in the last Office Action. Applicants' argument, that Goebel does not describe partial combustion of the feed stream before the reforming section, is not convincing. , since Goebel discloses in Paragraph [0019] that an embodiment includes direct vaporization of water by fuel rich combustion exhaust to produce steam, hydrogen and CO and charging the same into an autothermal reactor. The combustion in such embodiment would be partial since it is "fuel rich" and the combustion exhaust charged into the autothermal reactor would inherently contain fuel, since Goebel defines "autothermal reforming" as "reforming in which the fuel partially reacts with steam and partially reacts with oxygen (or air) in a combination steam reforming and partial oxidation type reactor. (See Paragraph [0002].) In any event, assuming that the stream containing steam,

hydrogen and CO disclosed in Paragraph [0019] of Goebel did not include uncombusted fuel, such fuel would have reacted with the vaporized steam, thus constituting the "reforming" step as recited in applicants' claim 1.

Claims 6, 7 and 10-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goebel, for the reasons given in the last Office Action. Applicants' argument, that the cyclical compression chamber 200 of applicants' invention is equipped with an ignition source 240 such as, for example, a spark plug, is not convincing, since claims 6 and 9 do not require that the combustion occur within the cyclical compression chamber.

In claim 3, line 2, applicants are invited to change "or" to -- and -- to provide proper Markush terminology.

Claims 8 and 9 are objected to as based on a rejected parent claim, and would be allowed if written in independent form.

Claims 15-22 are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
